Applicant's arguments see page 19, of the remarks filed on 3/23/07. The prior art of Kuo, (US.5,606,627) describes the pair of images as being taken from the same vehicle, i.e., on the same orbit and the same distance from the target. Kuo does not teach, disclose, or suggest "means for selecting a pair of frames from a plurality of candidate picture frames of a target area captured from a plurality of orbits, each of the pair of frames having been independently captured on a unique orbit of the plurality of orbits", as commonly included in each of the independent claims 1 and 47 as mention above the prior art of record fails to teach either singularly or in combination, fails to anticipate or render the above limitations obvious.
